

## Casper Summer Safety Seminar

Join fellow airmen for an informative evening of discussion and education. First, we'll take a look at Loss of Control accidents in the landing phase of flight, which have become a serious issue. We'll discuss one of the simplest methods for combatting this problem; flying a stabilized approach. Then, whether you own or rent an airplane you won't want to miss out on the second presentation of the evening which will focus on your responsibility in ensuring the aircraft you fly is in an airworthy condition.

**Directions:** Access the terminal building through the main street side entry doors. The meeting will be held in the Hangar Room, which is the conference room behind the restaurant/bar.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
